**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asahi Chemical Industry Co., Ltd. JP-11-181199, in view of Asahi Chemical Industry Co. Ltd. JP-10-204173, further in view of Ibe et al. 4,788,277.
3. 1.01 and about 1 still overlap. The rejection is maintained.

***Response to Arguments***

4. Applicant's arguments filed 2/12/07 have been fully considered but they are not persuasive. About 1% is a small amount. This is confirmed by Ibe et al. in column 3, line 45. Since the reference discloses a range of o-cresol concentrations up to 1.10% (about 1%), there is motivation to use any amount of o-cresol in that range. It might even be advantageous to use a raw material "contaminated" with o-cresol, without having to refine it somehow. About 1% or less is not less than about 1%, which would be teaching away. The so-called unexpected results are not commensurate with the claims. A showing of a difference between PPE containing 0.9% o-cresol and PPE containing 1.1% o-cresol would be unexpected, but there is a lot of ground between 0.01 and 1.01. A claim claiming 3-7% o-cresol would overcome this rejection.
